

## **The Questions:** for Employers, Employees, and/or People Seeking Professional Self-Development in GIS

1. Would you like to provide professional hands-on GIS (Geographic Information Systems) & GEOSPATIAL TECHNOLOGY training for yourself &/or staff without requiring anyone to have acquired a degree, and without pursuing an advanced degree??
2. Would you like to pursue additional GEOSPATIAL TECHNOLOGY training from your workplace or home to increase your marketability??
3. Do you want to learn *new* skills to realize *benefits* of how GIS & GEOSPATIAL TECHNOLOGY can make your agency more efficient? Do you wish to *update* your skills in the latest in GEOSPATIAL TECHNOLOGY??
4. Would you like to *select from* and *customize* your own GIS learning topics??

## **The Answer:** The online Professional Certificate sequence in GeoSpatial Technology (GIS)

- Offered by The Department of Resource Analysis (RA) of Saint Mary's University of Minnesota.
- Certificate is offered through the form of Continuing Education Units.
- Goal: To provide learning opportunities for people in technology or non-technology fields who are seeking to build their geospatial technology skills.
